# **Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings of claims in the application:

# **Listing of Claims:**

# 1-27. (canceled)

28. (currently amended) A composition for delivering an agent to cells, the composition comprising the agent and a delivery enhancing compound of <u>formula</u>: Formula I:

$$X_1$$
— $C$ — $N$ — $(CH_2)_{\overline{m}}$ — $N$ — $(CH_2)_{\overline{n}}$ — $NH$ — $C$ — $X_3$ 
 $C$ = $O$ 
 $X_2$ 

$$X_1$$
— $C$ — $N$ — $(CH_2)_{\overline{m}}$ — $N$ — $(CH_2)_{\overline{n}}$ — $NH_3^+X^ C$ = $O$ 
 $X_2$ 

**PATENT** 

$$X_1$$
— $C$ — $N$ — $(CH_2)_{\overline{m}}$ — $N$ — $(CH_2)_{\overline{n}}$ — $N^+(CH_3)_3X^ C$ = $O$ 
 $X_2$ 

wherein:

## X is a counterion;

m and n are the same or different and each is an integer from 2-8; R forms a

 $X_1$  is selected from the group consisting of

 $X_2$ , and  $X_3$  are each independently selected from the group consisting of a saccharide group,

$$\begin{array}{c} CH_3 \\ OH \\ CH_2 \end{array} \qquad \begin{array}{c} CH_3 \\ OH \\ CH_2 \end{array} \qquad \begin{array}{c} CH_2 \\ CH_2 \end{array} \qquad \begin{array}{c} CH_2 \\ OH \\ CH_2 \end{array} \qquad \begin{array}{c} CH_2 \\ CH_2 \\ CH_2 \end{array} \qquad \begin{array}{c} CH_2 \\ CH_2 \\ CH_2 \end{array} \qquad \begin{array}{c} CH_2 \\ C$$

wherein at least one of  $X_2$  and  $X_3$  is a saccharide group when  $X_3$  is present R

is

from the group consisting of a therapeutic protein, a therapeutic gene, a vector and an antisense nucleic acid.

- 29. (previously presented) The composition according to claim 28, wherein the saccharide group has between one to eight monosaccharide groups.
- 30. (original) The composition according to claim 29, wherein the saccharide group is selected from the group consisting of pentose monosaccharide groups, hexose monosaccharide groups, pentose-pentose disaccharide groups, hexose-hexose disaccharide groups, pentose-hexose disaccharide groups, and hexose-pentose disaccharide groups.
- 31. (original) The composition according to claim 28, wherein the saccharide group is a trisaccharide.
- 32. (original) The composition according to claim 28, wherein the concentration of the delivery enhancing compound is about 0.002 to about 2 mg/ml.
- 33. (original) The composition according to claim 32, wherein the concentration of the delivery enhancing compound is about 0.2 to 2 mg/ml.
- 34. (original) The composition according to claim 28, wherein the agent modulates a biological process in a cell when the agent is present in the cell.
- 35. (original) The composition according to claim 34, wherein the biological process is selected from the group consisting of cell growth, differentiation, proliferation, a metabolic or biosynthetic pathway, gene expression, a disease-associated process, and an immune response.

- 36. (original) The composition according to claim 28, wherein the agent comprises a polynucleotide.
- 37. (previously presented) The composition according to claim 36, wherein the polynucleotide is selected from the group consisting of a triplex-forming nucleic acid, and a nucleic acid that comprises a gene which encodes a polypeptide.
- 38. (original) The composition according to claim 37, wherein the gene is a tumor suppressor gene.
- 39. (original) The composition according to claim 37, wherein the tumor suppressor gene is selected from the group consisting of a retinoblastoma gene and a p53 gene.
- 40. (original) The composition according to claim 28, wherein the composition further comprises a polymeric matrix.
- 41. (original) The composition according to claim 28, wherein the composition further comprises a mucoadhesive.
- 42. (currently amended) A delivery enhancing compound of <u>formula</u>: <del>Formula</del> I:

$$X_1$$
— $C$ — $N$ — $(CH_2)_{\overline{m}}$ — $N$ — $(CH_2)_{\overline{n}}$ — $NH$ — $C$ — $X_3$ 
 $C$ = $O$ 
 $X_2$ 

$$X_1$$
— $C$ — $N$ — $(CH_2)_{\overline{m}}$ — $N$ — $(CH_2)_{\overline{n}}$ — $NH_3^+X^ C$ = $O$ 
 $X_2$ 

$$X_1$$
— $C$ — $N$ — $(CH_2)_{\overline{m}}$ — $N$ — $(CH_2)_{\overline{n}}$ — $N^+(CH_3)_3X^ C$ = $O$ 
 $X_2$ 

wherein:

# X is a counterion;

m and n are the same or different and each is an integer from 2-8; R forms a

X<sub>1</sub> is selected from the group consisting of

$$\begin{array}{c} CH_3 \\ OH \\ CH_2 \end{array} CH_2 \\ \end{array} \text{ and } CH_2 \\ \end{array}$$

 $X_2$ , and  $X_3$  are each independently selected from the group consisting of a saccharide group,

wherein at least one of  $X_2$  and  $X_3$  is a saccharide group when  $X_3$  is present R

is

$$C$$
 $X_3$ 

43. (currently amended) The compound of claim 42, wherein the compound is of the formula:

$$X_1$$
— $C$ — $N$ — $(CH_2)_{\overline{m}}$ — $N$ — $(CH_2)_{\overline{n}}$ — $NH_3^+X^ C$ = $O$ 
 $X_2$  or

$$X_1$$
— $C$ — $N$ — $(CH_2)_{\overline{m}}$ — $N$ — $(CH_2)_{\overline{n}}$ — $N^+(CH_3)_3X^ C$ = $O$ 
 $X_2$ 

wherein R forms a cationic group selected from the group consisting of NMe<sub>3</sub><sup>+</sup> and NH<sub>3</sub><sup>+</sup>.

- 44 (previously presented). The compound of claim 42, wherein the saccharide group has between one to eight monosaccharide groups.
- 45. (original) The compound of claim 44, wherein the saccharide group is selected from the group consisting of pentose monosaccharide groups, hexose monosaccharide groups, pentose-pentose disaccharide groups, hexose-hexose disaccharide groups, pentose-hexose disaccharide groups, and hexose-pentose disaccharide groups.
- 46. (original) The compound of claim 42, wherein the saccharide group comprises between three and about eight monosaccharide residues.
- 47. (original) The compound of claim 46, wherein the saccharide group is a trisaccharide.
- 48. (currently amended). The compound of claim 42, wherein at least one of  $X_2$  and  $X_3$  is a <u>disaccharide group</u>.
- 49. (original) The compound of claim 42, wherein m and n are each independently 2 or 3.
- 50. (currently amended) The compound of claim 42, wherein both  $X_1$  and  $X_2$  are both

and  $X_3$  is [[a]] the saccharide group.

- 51. (original) The compound of claim 42, wherein the saccharide group is a hexose-hexose disaccharide group.
  - 52. (canceled).
- 53. (previously presented) The compound of claim 42, wherein m and n are each 3,

X<sub>1</sub> and X<sub>3</sub> are both

and X<sub>2</sub> is a hexose monosaccharide group.

54. (previously presented) The compound of claim 42, wherein m and n are each 3,

 $X_1$  and  $X_2$  are both

and X<sub>3</sub> is a hexose-hexose disaccharide group.

55. (previously presented) The compound of claim 42, wherein m and n are each 3,  $X_1$  and  $X_3$  are both

Appl. No. 10/055,863 Amdt. dated July 23, 2007 Reply to Office Action of April 23, 2007 **PATENT** 

$$CH_3$$
 $CH_2$ 
 $CH_2$ 

X<sub>2</sub> is a hexose-hexose disaccharide group.

56. (previously presented) The composition according to claim 28, wherein the compound has a Formula III:

57. (previously presented) The composition according to claim 28, wherein the compound has a Formula IV:

58. (previously presented) The composition according to claim 28, wherein the compound has a Formula V:

59-81. (canceled)

- 82. (previously presented) The composition according to claim 28, wherein the agent is a gene encoding an interferon.
- 83. (previously presented) The composition according to claim 82, wherein the interferon is a member of the group selected from  $\alpha$ -interferon,  $\beta$ -interferon, and  $\gamma$  interferon.
- 84. (previously presented) The composition according to claim 83, wherein the interferon is  $\alpha$ -interferon.
- 85. (previously presented) The composition according to claim 28, wherein the gene is incorporated into a vector.
- 86. (previously presented) The composition according to claim 28, wherein the vector is a recombinant viral vector.

- 87. (previously presented) The composition according to claim 86, wherein the recombinant viral vector is selected from the group consisting of a herpes viral vector, retroviral vector, vaccinia viral vector and an adenoviral vector.
- 88. (previously presented) The composition according to claim 87, wherein the recombinant viral vector is an adenoviral vector.
- 89. (previously presented) The composition according to claim 88, wherein the adenoviral vector has a deletion of the protein IX gene.
- 90. (previously presented) The composition according to claim 32, wherein the concentration of the delivery enhancing compound is about 0.1 to 1 mg/ml.
- 91. (previously presented) The composition according to claim 28, wherein the therapeutic gene is selected from the group consisting of a tumor suppressor gene, a suicide gene, a triplex forming nucleic acid molecule, a gene encoding a cytokine, a gene encoding an interleukin, and a gene encoding a colony stimulating factor.
- 92. (previously presented) The composition according to claim 28, wherein the agent is an antisense nucleic acid molecule.
- 93. (previously presented) The composition according to claim 28, wherein the agent is a therapeutic protein.
- 94. (previously presented) The composition according to claim 35, wherein the proliferation is a neoplatic disorder.
- 95. (previously presented) The composition according to claim 94, wherein the neoplastic disorder is cancer.

- 96. (previously presented) The composition according to claim 91, wherein the gene encoding a cytokine is selected from the group consisting of interferons  $\alpha$ ,  $\beta$ ,  $\delta$ , and  $\gamma$ .
- 97. (previously presented) The composition according to claim 91, wherein the gene encoding an interleukin is selected from the group consisting of IL-1, IL-2, IL-4, IL-6, IL-7 and IL-10.
  - 98. (previously presented) A composition, the composition comprising: a compound having the formula

an agent selected from the group consisting of a therapeutic protein, a therapeutic gene, a vector and an antisense nucleic acid.

Ш

- 99. (previously presented) The composition according to claim 98, wherein the therapeutic gene encodes interferon.
- 100. (previously presented) The composition according to claim 99, wherein the interferon is  $\alpha$ -interferon.
- 101. (previously presented) The composition according to claim 99, wherein the interferon is  $\beta$ -interferon.

- 102. (previously presented) The composition according to claim 99, wherein the interferon is  $\delta$ -interferon.
- 103. (previously presented) The composition according to claim 99, wherein the interferon is  $\gamma$ -interferon.
- 104. (previously presented) The composition according to claim 99, wherein the gene encoding interferon is incorporated in a viral vector.
- 105. (previously presented) The composition according to claim 104, wherein the viral vector is an adenoviral vector.
- 106. (previously presented) The composition according to claim 105, wherein the adenoviral vector comprises a CMV promoter.
- 107. (previously presented) The composition according to claim 105, wherein the adenoviral vector has a deletion of the protein IX gene.
- 108. (previously presented) The composition according to claim 105, wherein the composition comprises about  $1.0 \times 10^8$  particles/ml to  $1.0 \times 10^{12}$  particles/ml of the adenoviral vector.
- 109. (previously presented) The composition according to claim 105, wherein the composition comprises about  $1.0 \times 10^9$  particles/ml to  $1.0 \times 10^{11}$  particles/ml of the adenoviral vector.
- 110. (previously presented) The composition according to claim 105, wherein the composition comprises about  $1.0 \times 10^8$  particles/ml to  $5.0 \times 10^{11}$  particles/ml of the adenoviral vector.

- 111. (previously presented) The composition according to claim 105, wherein the composition comprises about  $5.0 \times 10^{11}$  particles/ml of the adenoviral vector.
- 112. (previously presented) The composition according to claim 98, wherein the composition further comprises a buffer.
- 113. (previously presented) The composition according to claim 98, wherein said compound of formula III and the gene encoding interferon are mixed just prior to administration to the patient.
- 114. (previously presented) The composition according to claim 98, wherein the concentration of the compound is about 0.002 to about 2 mg/ml.
- 115. (previously presented) The composition according to claim 114, wherein the concentration of the compound is about 0.2 to 2 mg/ml.
- 116. (previously presented) The composition according to claim 114, wherein the concentration of the compound is about 0.1 to 1 mg/ml.
- 117. (previously presented) The composition according to claim 98, wherein the therapeutic gene is selected from the group consisting of a tumor suppressor gene, a suicide gene, a triplex forming nucleic acid molecule, a gene encoding a cytokine, a genes encoding an interleukin, and a gene encoding a colony stimulating factor.
- 118. (previously presented) The composition according to claim 117, wherein the gene encoding an interleukin is selected from the group consisting of IL-1, IL-2, IL-4, IL-6, IL-7 and IL-10.
- 119. (previously presented) The composition according to claim 98, wherein the agent is an antisense nucleic acid.

Appl. No. 10/055,863 Amdt. dated July 23, 2007 Reply to Office Action of April 23, 2007

<u>PATENT</u>

120. (previously presented) The composition according to claim 98, wherein the agent is a therapeutic protein.
